THE UNIVERSITY OF CHICAGO

PHYSICS DEPARTMENT

Chicago, Illinois

September 10, 1954

Dear Sir:

Enclosed are two copies of a report on the results of the experiment on the measurement of the cross section for the reaction  $p + p \rightarrow p + p + \pi^0$  at 180 Mev. The report is written in the form of a letter to you.

Very truly yours,

Robert F. Schmitt

Professor of Physics

University of Chicago

Chicago, Illinois

Very truly yours,  
Robert F. Schmitt

The friendly hospitality of the West has been extended to you during your visit to Alberta. We hope you have enjoyed your stay and may return soon to renew happy acquaintances. We would like you to share again with us the magnificent grandeur of our mountains, lakes and forests, the beauties of our prairies and parklands, and the friendliness of our people.

We ask you to tell your friends about Alberta and to assure them that Canada's Princess Province awaits them with a warm western welcome.
